

How do I find the difference of two or more integers?

Questions /Main Ideas	Class Notes
How do I subtract integers?	To subtract an integer, add its opposite. $3 - 4 = \square$ $3 + (-4) = -1$ $-8 - (-13) =$ $-8 + 13 = 5$

Summary

When you are subtracting integers, change the subtraction sign to addition and then change the next number to its opposite.
